Dear Mr. Kelly:

Thank you for selecting Pella® products for your home. I understand you are inquiring about the amount of titanium dioxide found in Pella vinyl products including Encompass, 250 Series, and 350 Series.

This document certifies that all formulations blended for Pella profile extrusions contain more than 8-phr titanium dioxide.

Thank you for the opportunity to address your concerns.

Sincerely,

Kevin Priest
International Business Development Specialist
